

Application:

Design Features:

Cim-Tek® Filtration TANK SAMPLER KIT

- Portable hand-operated vacuum suction pump device designed to determine fuel conditions present in fuel storage tanks
- For use on underground and above-ground tanks for gasoline, diesel fuels, alcohol-blended fuels, as well as fuel oil tanks
- Oil reservoirs and drums may also be tested
- 6' & 14' polyurethane suction hoses with brass weights
- Equipped with 3 shatter-proof sample containers
- Metal insert for placement of sample containers

Revised 03/07

Benefits:

- Collects more accurate samples than water finding paste
- Case is portable, easy to store and impervious to decomposition caused by fuels
- Kit is trouble-free and will work on any size tank
- Metal container holder will keep samples from spilling
